

The Illinois Section's UESI and CI joint May Dinner Meeting Commonwealth Edison Utility Relocation Process

The ComEd Facility Relocation group works with DOT agencies and public works departments to alleviate conflicts and clear the way for new infrastructure within communities across Illinois. Commonwealth Edison received 2,246 project review requests in 2023 identifying conflicts with all types of public improvement projects. Projects include roadway resurfacing and reconstruction, sewer and water main improvements, traffic modernization, road widening and right-of-way expansion, etc. The Presentation will discuss the ComEd conflict review and relocation process.

Join us on Thursday May 16th for a wonderful dinner at the offices of HBK Engineering at 2101 W. Carroll Ave. Chicago, IL (West Town Office), dinner at 5:30 p.m. (Street parking available). Any questions, please reach out to Bethany Turk, Vice-Chair, UESI at bturk@hbkengineering.com

Registration is coming soon (\$65/per person). Sponsorships will be available at \$250/each and does include attendance for 2 registrants and the display of the sponsors logo.

About the speakers:

Vincent Mazzaferro is a member of the ComEd Facility Relocation team. He has worked as an engineer, project manager, and manager on utility and public improvement projects. Vincent is leading a team that collaborates with over 280 external agencies throughout ComEd's territory including coordination with IDOT, CDOT, and the Illinois Tollway.

Eileen Koplín is a Project Manager at HBK Engineering. She plays a critical role as a designer lead for the utility relocation programs within the organization. Her experience spans across the Chicagoland area and covers concept design through construction. Some of her clients include ComEd, AT&T, Verizon, CenturyLink, Zayo, Comcast, and Windstream.
